

Get connected with scalable point-to-point network solutions.

Does your business rely on high speed data applications? In today's world, VoIP, video and data transmission dictates the need for stable and secure bandwidth that simplifies data transfer and connectivity.

Additionally, scalability is crucial – tomorrow's applications may mean that your business requires additional bandwidth – and needs to work with a versatile provider that can customize solutions for your growing needs.

Build a bridge between your businesses.

Wolfe's Ethernet Virtual Private Line allows you to connect two locations within a metropolitan area with a dedicated private line connection. It closes the distance gap, making communication as easy as if you were next door.

You can use your secure Ethernet Virtual Private Line as a stand-alone, secure way to transmit data. With speeds from 10 Mb/s to 10 Gb/s, you can choose the exact amount of bandwidth you need for maximum efficiency. If your needs change, the technology scales with it – giving your business the flexibility it needs for continued growth.

ETHERNET VIRTUAL PRIVATE LINE

Wolfe provides your business security, speed and scalability – for a price that's much less than you'd expect.

Call Wolfe today at 1-800-WOLFENET or visit www.wolfe.net.

- **Get the blazingly fast speed your business needs.**

Data transfer time is significantly shortened allowing you to do more in less time.

- **You control the configuration.**

Your IT team can control how to route, manage and prioritize applications. Policing content and inserting data encryption is simplified and no special provisioning is needed for most applications.

- **Instant network accessibility.**

Get online when you need to – quickly and efficiently. Your Ethernet Virtual Private Line is a familiar technology that's easy to connect to and run.

- **Protect your network from prying eyes and viruses.**

Bypassing a public network gives you the peace-of-mind that your system is safe and secure.

- **Instant scalability on your terms.**

Preparing for the future? Your Ethernet Virtual Private Line can easily scale from 10 Mb/s to 10 Gb/s.

- **Get the class of service that works best for your business.**

Your company can access multiple classes of service which are 100% customizable to your needs.

Plus, Wolfe's Ethernet Virtual Private Line is competitively priced 30-50% less than competitors.

Wolfe specializes in helping businesses connect and move their data around easier, faster and safer. Our network is native IPv6 capable and our network technology is powered by Cisco – so you have the peace of mind knowing that your network solution will be safe, scalable and reliable. Plus, our obsessive attention to customer service 24/7 will exceed your expectations – every time.

Let our experienced team develop a customized network solution for your business – at no extra charge to you.
