

Transfer your data quickly, reliably and safely.

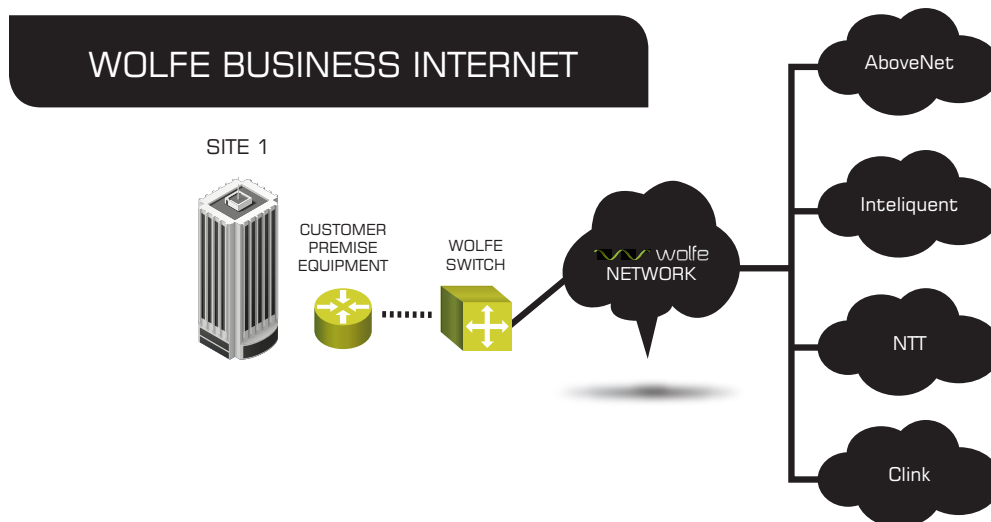

Need fast access for business-critical applications, such as email, VoIP and sending large files? Dedicated high speed Internet access ensures that your company can easily accomplish mission-critical tasks – and stay connected to customers, business partners and employees.

Today's high speed access may not be fast enough for tomorrow. That's why you need the flexibility to provision the exact capacity your business needs. As your company grows, your bandwidth can grow with it – easily and cost effectively.

Wolfe Business Internet gives you the control and flexibility you need.

Wolfe's Business Internet provides your company reliable access, guaranteed provisioning and 24/7 customer support. You can select to have Wolfe manage your components. Or, you can provide your own solution and provide your own equipment. Either way, your Internet access is proactively managed around the clock.

This solution provides your business the utmost in flexibility. Instead of a "one-size-fits-all" solution, you'll have a wide range of fast symmetrical access speeds, access methods and options. Depending on your needs, Wolfe can provide business voice applications, security solutions, manageable redundancy options and five classes of service.

Wolfe Business Internet provides end-to-end management, speed and scalability — for a price that's much less than you'd expect.

Call Wolfe today at 1-800-WOLFENET or visit www.wolfe.net.

- **Blazing fast speed and bandwidth.**

Send files faster than ever before. Wolfe Business Internet provides an advanced IP network with speeds from 10 Mb/s to 10 Gb/s. Plus, symmetrical connectivity gives you fast data transfer in both directions.

- **Control how you pay for bandwidth.**

Wolfe Business Internet provides your business flexible billing options. You can choose from static or burstable billing.

- **Extensive IP peering arrangements.**

Wolfe has multiple arrangements with other Tier 1 carriers, including NTT, Inteliquent, AT&T and Level 3.

- **Powerful and reliable.**

Wolfe Business Internet has a dedicated port into the Wolfe MPLS backbone, which has no single core backbone point of failure.

Plus, Wolfe Business Internet is competitively priced 30-50% less than competitors.

Wolfe specializes in helping businesses connect and move their data around easier, faster and safer. Our network is native IPv6 capable and our network technology is powered by Cisco – so you have the peace of mind knowing that your network solution will be safe, scalable and reliable. Plus, our obsessive attention to customer service 24/7 will exceed your expectations – every time.

Let our experienced team develop a customized network solution for your business – at no extra charge to you.
